

framcolor 2001

COLOR COMPARISON GUIDE

framcolor 2001 and framesi Mixcolor Crema[®]

INTRODUCTION

Color Comparison Guide

Every color line is unique. This color conversion guide provides you with quick reference for converting your existing formulations to **framcolor 2001**. A test strand is recommended for best results. This guide is not designed to replace hands on education, which is offered to you *free of charge* as a new **framesi** customer.

For optimum results, use this guide in conjunction with the framesi Five Steps to Formulation:

- 1. DETERMINE THE NATURAL LEVEL (NL)**
Match the natural level of the hair using the "NP" Series on the **framcolor 2001** Swatch Chart.
- 2. DETERMINE THE DESIRED LEVEL (DL)**
Determine the final desired level. Is the client going darker, lighter, or staying the same color level?
- 3. DETERMINE THE TONAL VALUE OF THE DESIRED LEVEL**
The final tone results depend upon the base of the color applied and the remaining color at the desired level. Remaining color is the color the natural hair is lifted to during processing period. Remaining color is found at the desired lift level on the chart. When coloring hair, the remaining color may be enhanced or refined, depending on the base of the series applied. Refer to the "Color Wheel" and "Series/Bases" in the **framcolor 2001** manual.
- 4. DETERMINE THE CORRECT DEVELOPER**
Refer to *Developer Usage Chart* on next page.
- 5. DETERMINE THE PERCENTAGE OF GRAY HAIR**
Gray hair is lacking in all three primaries. To achieve the most natural result, **framesi** recommends the use of the "EXN", "NP", "W", "CB", "G", "E", "ER", or "Extra" Series. These Series can be used alone, or depending on the desired tone and intensity, the other Series can be added. For more information on gray coverage, refer to "Gray Coverage" section in the **framcolor 2001** manual.

100% Vegan ♥ Gluten Free ♥ Cruelty Free ♥ Sulfate Free

For live assistance call **framesi** Technical Assistance at 1.800.245.6323,

Mixcolor Crema® transforms **framcolor 2001** into a Tone-on-Tone,
Deposit-Only Haircolor System.

Mixcolor Crema

Mixing Application & Timing Instructions for:

Gray Blending

Mix Ratio*:

20cc **framcolor 2001**
80cc **Mixcolor Crema**

Instructions:

1. Mix to creamy consistency
2. Apply formula from root to end
3. Process at room temperature for 20-30 minutes
4. For a Mixcolor Crema touch-up, apply to regrowth only, and pull through faded ends for the last 10 minutes of processing

* For Maximum Deposit on Resistant Gray:

20cc **framcolor 2001**
60cc **Mixcolor Crema**

Toning Highlights Color Refreshing/Balancing Shine Enhancer

Mix Ratio:

20cc **framcolor 2001**
40cc **Mixcolor Crema**
40cc **framesi** conditioner

Instructions:

1. Mix to creamy consistency
2. Apply formula from root to end
3. Process at room temperature for 5 - 15 minutes

For Shine Enhancer, use:

framcolor 2001 9SD for levels 5 & lighter, or
framcolor 2001 6SD for levels 4 & darker.

"Shampoo Cap" at the Bowl

Mix Ratio

20cc **framcolor 2001**
40cc **Mixcolor Crema**
40cc **framesi** Shampoo

Instructions

1. Mix thoroughly
2. Shampoo into hair
3. Process at room temperature for 5-15 minutes, depending on desired end result

Stylist Tip:

If more conditioning is desired, the **framesi shampoo** can be replaced with the appropriate **framesi conditioner**.
